

# Bare Root Perennials

AUTUMN  
**2023**

**Kébol**   
Finest ★ quality ★ plants

## “Unlimited flexibility in product selection and logistics.”

### Sharing our passion for flower bulbs and perennials

Ever since its establishment in 1989, Kébol has been an ambitious and innovative player in the global market for high-quality flower bulbs and perennials.

All activities within our family firm spring from fascination and love for flower bulbs and perennials. As an expert supplier, we master every aspect of the horticultural business: from breeding, growing and preparation to marketing and distribution. With you we share our passion for colourful products that make people smile all over the world. This has been the starting point for many of our long-term relationships in the market.

#### Working together with Kébol has even more advantages:

- Broad expertise throughout the supply chain: breeding, growing, preparing, marketing and distribution
- High-quality standards
- First-class customer service
- In-house sourcing and procurement
- A wealth of skilled and experienced staff

With devotion to horticultural products and the right expertise to grow and sell top-quality products, Kébol makes a huge difference in the market!

#### Your reliable partner

With a wide product range we serve the market demands of several target groups (retail, mail order, wholesale, institutional markets and individual growers). Our excellent working relationship with growers and our customers enable us to supply a reliable product. Reliable in the sense of quality, delivery, logistics, cultivation support, product innovation and service.

#### Market leader in Amaryllis

As a market leader in Amaryllis, we take pride in our ability to grow such a splendid product in Brazil and Peru in a responsible manner. The right climatic conditions ensure we get beautiful, healthy amaryllis bulbs of top quality, perfect for dry sales and pot production.

#### Home & Garden

Aiming at retail sales and mail order, Kébol has developed a number of attractive packaging lines. Our home & garden program varies from economy assortments for supermarkets to wider ranges for garden centres. Each season, these lines are updated with new varieties and presented in an easy-reference catalogue. At Kébol we closely follow lifestyle trends. Product selection and package design are carefully geared towards customer preferences observed within your target groups.

#### Bareroot Perennials

We offer the most comprehensive and creative range of bare root perennials on the market. All sourced from cutting-edge genetics and breeders around the world suited for wholesale and landscape growers, garden centres and mail order. With 30 years' experience in this market, we have built a strong reputation for high quality bare roots, innovative varieties and vast knowledge of these products. With the products of Darwin Plants by Kébol you are able to successfully grow and sell perennial plants.

## Certified

**Global G.A.P. Chain of Custody** - The GLOBALG.A.P. Chain of Custody Standard is an essential certificate for all producers and retailers handling GLOBALG.A.P. certified products. It ensures that any product bearing a GLOBALG.A.P. label or sold as a GLOBALG.A.P. label or sold as a GLOBALG.A.P. certified product is sourced from GLOBALG.A.P. certified farms.

#### MPS - Kébol MPS A no: 804698

MPS is an excellent certificate for delivery to supermarkets or other retailers. MPS-GAP means proven traceability, safety and hygiene of your products.

#### MPS GTP

Traceability, quality care, quality control and chain quality in one. With this we comply with the quality, environmental and social aspects with regard to our products and business operations.

#### SKAL - Kébol Skal no: 105453

The Pure assortment is Skal-certified (100% organic). Skal Biocontrole, the control authority, is dedicated to proving the reliability of organic products in the Netherlands.

#### Sustainable Suppliers of Horticultural Quality Products

We are a participant in Sustainable Suppliers of Horticultural Quality Products. In this way we contribute to a future-proof sector in which high-quality products are grown and traded with respect for people, society and the environment.

## Ordering

**For best availability for your desired ship, please order early.**

**Shipment dates cannot be altered after August 4th, 2023**

Our packing process begins on **August 4th**, so no changes to your order can be made after this date. Although we do accept orders after this deadline, the selection will be more limited and some varieties will be unavailable.

An acknowledgment will be mailed to you as soon as we have processed your order. All orders are subject to crop conditions. We have a long growing season and many unforeseen problems may occur which can damage crops and thereby reduce the amount of plants available. Every effort is made to fulfill orders, but the availability of a particular variety cannot always be guaranteed until we begin shipping. Therefore, we may have to cancel some items from your order at a later date.

## Pot tags

**United Kingdom & Ireland**

**Pot tags are automatically included with your bare root order.**

If you do not wish to receive tags, please clearly specify this information when you send or call in your order. Unless otherwise stated we will send 1 tag per plant.

**Rest of the World**

**Pot tags are only shipped upon request for bare root perennials.**

You can request tags for your complete order by checking the relevant box on the order form. Unless otherwise stated we will send 1 tag per plant.

We'll add tags in case of licensed varieties of bare root shrubs.

**For the following items the tag multiple is one tag per three corms.**

**Convallaria majalis, Crocosmia and Liatris** (except for Kobold).

Each tag includes full English descriptive information and notes on care and usage.

15cm

Label  
not shown  
actual size

## Multiples for bare root perennials

**Product is packed in multiples of 25, with the following exceptions:**

Convallaria majalis, Crocosmia and Liatris (not Kobold): multiples of 75.

We recommend 3 corms per pot. Peonies: multiples of 5.

Please check your orderform for more details on all products.

Roots are packed in strong large boxes that protect them during shipping!

- Great colour combination

Paeonia (Peony)  
**'White Cap'** (*Lactiflora Single*)

- Raspberry single flowers with ivory and pink staminodia

Paeonia (Peony)  
**'White Wings'** (*Lactiflora Single*)

- Slightly ruffled white petals
- Fragrant

Paeonia (Peony)  
**'Rosea Plena'** *officinalis* (*Common Peony*)

- Large double rose-pink flowers
- Needs staking

Paeonia (Peony)  
**'Rubra Plena'** *officinalis* (*Common Peony*)

- (Memorial Day Peony), huge, double, long-lasting deep-red flowers
- Needs staking

# Flower Bulbs

## Autumn 2023

Allium  
'Atropurpureum'

Allium  
'Caeruleum'

Allium  
'Cristophii'

Allium *ampletens*  
'Globemaster'

Allium *ampletens*  
'Gracefull Beauty'

Allium  
'Mount Everest'

Allium *aflatunense*  
'Purple Sensation'

Allium  
'Siculum'

Anemone  
'Blanda Mix'

Camassia  
'Cusickii'

Camassia  
'Leichtlinii Alba'

Chionodoxa  
'Luciliae'

Chionodoxa  
'luciliae Alba'

Chionodoxa  
'luciliae Violet Beauty'

Corydalis *solida*  
'Beth Evans'

Crocus *chrysanthus*  
'mix'

Crocus *chrysanthus*  
'Fuscotinctus'

Crocus *tommasinianus*  
'Ruby Giant'

Crocus *vernus*  
'Flower Record'

Crocus *flavus ssp. flavus*  
'Golden Yellow'

Crocus *vernus*  
'Jeanne D'Arc'

Crocus *vernus*  
'King Of The Striped'

Eranthis  
'Cilicica'

Fritillaria *imperialis*  
'Aurora'

Fritillaria *imperialis*  
**'Lutea'**

Fritillaria *imperialis*  
**'Rubra'**

Fritillaria  
**'Meleagris Mix'**

Hyacinthus  
**'Blue Trophy'**

Hyacinthus  
**'Carnegie'**

Hyacinthus  
**'City Of Haarlem'**

Hyacinthus  
**'Jan Bos'**

Hyacinthus  
**'Pink Surprise'**

Hyacinthus  
**'Woodstock'**

Tulip *triumph*  
**'Synaeda Amor'**

Tulip *viridiflora*  
**'Doll's Minuet'**

Tulip *viridiflora*  
**'Purple Doll'**

## 1. Upon Arrival

### Let the roots thaw out slowly

Most plants are shipped frozen at 28°F (-2°C) to keep them dormant. If the plant material is still frozen upon arrival please leave it in a cool, dry place to thaw out slowly so that it is able to adapt.

### Plants need fresh air: open all boxes and bags immediately upon receipt, but prevent dehydration.

Temperature and condensation will build up inside closed boxes, causing sprouting and rotting. However, plant material in open boxes can dry out easily, so ventilation should be minimal and prevent direct sunlight at all times.

### Check the condition of the roots in the boxes daily.

Plants that have started to sprout must be planted immediately. If any sign of fungal or bacterial infection is suspected, plants can not be stored anymore. Infected parts must be removed and the plants treated with fungicide and/or bactericide.

### Items that do not tolerate storage must be planted immediately.

Do not leave the plant material longer than necessary in the boxes and bags, for storage will reduce vigor for every species. If unable to transplant immediately, store in a cool place (2-8°C/36-46°F). When stored at higher temperatures with lower humidity, the vigor will be reduced dramatically. At temperatures higher than 68°F (20°C), the roots must be planted within 24 hours.

## 2. Planting

### Do not plant roots that are still frozen.

Frozen roots are not able to transport water to the buds. If the buds have thawed out before the roots have, they can be damaged by dehydration. Do not force thawing as this will create stressful conditions to the roots and buds.

### Handle the roots with great care to avoid breaking of buds and/or roots.

Some species have fragile buds and/or roots. Breaking off may decrease plant size.

### Don't let roots dry out during potting.

Prevent dehydration of the roots by planting them right away after you have taken them out of the box. Serious damage to fine-haired roots like Phlox can be done in 10 minutes, **they can dry out in 20 minutes!** Make sure the potting room is free of draught. Always cover roots during breaks.

### Rootpinching

Some plants root better if the roots are pinched (see table)

### Soil

It is necessary to use a well-drained potting soil to avoid roots staying wet, which can cause them to rot. Many problems come from a lack of adequate drainage. Don't give plants fertilizer before they are actively growing.

### Firm the soil around the roots: prevent air pockets

Roots should be centered in the pot and spread out evenly, with all roots facing downward. There must be good contact between all parts of the roots and the soil. Firm the soil around the roots. All of this is necessary for the roots to absorb water and nutrients.

### Many perennials should be planted "high"

Results of experiments conducted by Dr. Bill Miller of the Cornell University suggest that many perennials should be planted with the crown (intersection of the roots and the shoots) at or slightly **above** soil level, after watering and settling. Some plants such as Geranium Ballerina showed an almost absolute adhesion to deep planting (1/2 to 1" deep) with a nearly 100% loss. High planting, on the other hand, resulted in nearly 100% survival and good growth (Handling Bareroot Perennials, Growertalks, May 2004, by W.B. Miller and A. Bestic). The most important reason for this, is that plants will receive daylight sooner than when they are planted too deeply. With daylight, plants make energy, which they need for growing. Also, when planted too deeply the crown may stay too wet for too long, which can cause them to rot.

## 3. After Planting

### Water carefully.

After planting in early spring, do not water the first week: in this stage the roots can only accept little moisture and need to be stimulated to look for water. After this, slowly start with watering.

Also, the young shoots are especially vulnerable to overwatering before they appear above the soil: in this critical phase, over watering may cause suffocation of plant parts or damping-off diseases. Be extra careful with irrigation at low temperatures: plant growth is slower, therefore this critical phase lasts longer. Some plants need a dryer start than others. Once the plants have started to grow, revert to a **regular** watering schedule. Some plants prefer to be grown "dry," others "wet" (see table). Keep the soil moisture as constant as possible; too much fluctuation will harm the plant.

### Fungicide drench

A fungicide drench applied on plant material one to two weeks after planting can prevent problems.

### Greenhouse conditions

In early spring, plants have different requirements regarding temperature. Some plants prefer a cold start (35°-55°F / 2°-12°C), some a medium cold start (45°-65°F / 7°-18°C), others a warm start (60°-75°F / 16°-24°C). Prevent the young shoots from freezing at all times: some plants won't give you a second chance! Ventilation in the greenhouse is very important: little ventilation will cause problems with mildew and fungus.

## Claims

**Freight:** Concerns over delayed or damaged shipments must be reported on the carrier's bill of lading in order to be considered. Report your concerns to our office immediately.

**Product:** We guarantee all plants are true to name and of good quality when shipped. Any quality concerns or shortages must be reported to our office within 10 days of receipt of order to be considered. For any product claims or disputes, we shall be held liable for plant cost only and in no case shall be liable for any cost greater than that. If you received plants that are non-viable or did not break dormancy, you have 60 days to submit a claim for it to be considered.
