

A challenging season, a promising harvest

Starting in week 36, the first bare root perennials, including Peonies and Iris, will arrive at Kébol Plants for packaging and preparation for shipment. Deliveries to the USA and Canada are scheduled from week 41 onwards.

This season has brought its share of challenges. Growers have faced periods of extreme weather, ranging from heavy rainfall to dry and warm conditions. Despite these circumstances, harvest results are encouraging. While yields vary between cultivars, overall production is meeting expectations and quality levels remain good. Availability of 2-3 and 3-5 size peonies is excellent. The positive outcome is largely thanks to the dedication and expertise of our growers and suppliers. Throughout the season, they have worked hard to maintain plant quality and ensure reliable production. Their efforts continue to result in high-quality bare root products for the market.

Harvest progressing well

The harvest of early peony varieties began in week 32. These varieties are suitable for longer storage under carefully controlled conditions, allowing Kébol to supply them throughout the fall and winter season. Other varieties will be delivered to Kébol during November and December and prepared for shipment in January and February. Although weather conditions have been unpredictable, harvesting activities are progressing according to schedule. The overall quality of the crop meets expectations, demonstrating the resilience of both the plants and the growers behind them. After harvest, the peonies undergo hot water treatment, an essential process that helps eliminate harmful organisms and reduce disease pressure. This treatment is followed by thorough inspection, sorting, cleaning, and grading to ensure uniformity and quality. The harvest is expected to be completed by the end of October.

Bare Root season is underway – the first plants are crossing the Atlantic!

We are pleased to announce that the first containers destined for the United States have been shipped. Travelling in a temperature-controlled environment, the plants will arrive in excellent condition and ready for fall planting. Arrival at the port is currently planned for week 41.

Upon arrival, the shipment will be received at our logistics hub in Waynesboro, Virginia, where the plants will be stored under optimal conditions before distribution throughout North America. Orders will be delivered via UPS or LTL transportation, depending on shipment volume.

Why Kébol Plants bare roots?

Kébol Plants offers the most comprehensive and creative range of bare root perennials on the market. All sourced from cutting-edge genetics and breeders around the world. In a matter of just weeks a high quality, premium perennial is available for sale. Our knowledgeable perennial team is here to advise you which varieties to grow and how to grow them successfully. Do not hesitate to contact us via chat, email - Joey@kebol.nl or call us at +31 610 99 1 000.

Grow-and-Go Growers' Favourites

Looking for reliable perennial genera that are easy to grow and quick to finish? Our Grow-and-Go selection combines efficient production with strong retail appeal.

Why choose Grow-and-Go?

- * Popular genera trusted by growers and garden centers
- * Ready for sale in just 10-12 weeks from bare root
- * Dicentra finishes in only 4-6 weeks
- * First-year flowering (except Paeonia)
- * Ideal for 1 US gallon production
- * Suitable for hoop house, cold greenhouse, and outdoor cultivation

Why Choose Kébol Bare Root Perennials?

Start your season with high-quality bare root perennials from Kébol. Featuring modern genetics from leading breeders, our vernalized plants are ready to flower in their first year and can be finished for sale within just a few weeks.

- * Easy to grow
- * First-year flowering
- * Fast finishing
- * Uniform, high-quality bare roots

Missed the autumn delivery deadline?

There is still time to secure Iris germanica and Paeonia for spring planting. To ensure the best availability, we recommend placing orders before November 1st. Later orders can still be accepted, subject to availability
